PROFESSIONAL EXPERIENCE

System Administrator and IT professional with 6 years of experience supporting Department of Defense and enterprise environments. Experienced in Red Hat Enterprise Linux, Windows Server, VMware, cybersecurity compliance, vulnerability remediation, automation, and mission-critical operations. Currently supporting U.S. Space Force telescope and sensor systems in a secure environment. Proven ability to troubleshoot complex systems, implement security controls, automate administrative tasks, and collaborate with engineering and cybersecurity teams.

PROFESSIONAL EXPERIENCE

BAE Systems – 15th Space Surveillance Squadron
Systems Administrator / Telescope Operations Support
Maui, HI | May 2025 – Present

- Support mission-critical telescope and sensor systems for U.S. Space Force space domain awareness operations.
- Administer Red Hat Enterprise Linux and Windows systems supporting operational missions.
- Collaborate with ISSO and cybersecurity personnel to maintain compliance with STIG and security requirements.
- Deploy security updates, signatures, and endpoint protection policies through Trellix ePO.
- Monitor system health, operational status, and security events using Splunk.
- Troubleshoot Linux servers, network connectivity, mission applications, and supporting infrastructure.
- Support maintenance activities, upgrades, and vulnerability remediation efforts.
- Develop technical procedures and documentation to improve operational efficiency and reliability.

BAE Systems
System Administrator II
Manchester, NH | March 2023 – May 2025

- Administered Windows Server and Red Hat Enterprise Linux enterprise environments.
- Managed VMware ESXi and vCenter infrastructure supporting production systems.
- Conducted vulnerability remediation and security hardening using DISA STIG standards.
- Performed Nessus assessments and compliance reporting activities.
- Managed Windows and Linux patching operations using automation tools.
- Utilized Splunk and Trellix ePO for security monitoring and policy enforcement.

- Supported backup and disaster recovery operations using Veeam and Backup Exec.
- Developed automation solutions using PowerShell and Ansible to reduce administrative workload.

C2Squared Systems

Technical Analyst

Manchester, NH | February 2022 – February 2023

- Provided enterprise IT support and systems troubleshooting.
- Supported infrastructure maintenance, incident response, and operational support activities.
- Created technical documentation and assisted with system administration tasks.
- Participated in on-call support rotations and issue resolution efforts.

United States Air Force

Information Technology Specialist

October 2015 – March 2022

- Supported NIPR and SIPR network environments.
- Managed IT assets, workstation deployments, and system upgrades.
- Assisted with cybersecurity compliance and operational support initiatives.
- Provided technical support and troubleshooting for end users and mission systems.

EDUCATION

Western Governors University Master of Science, Computer Science (In Progress)

American Military University Bachelor of Science, Information Security Graduated June 2021

CERTIFICATIONS

- CompTIA Security+
- Enterprise Linux System Administration
- Windows Server Administration
- Python Foundations
- Automation with Ansible

TECHNICAL PROJECTS

Fortran to Java Object-Oriented Translation Project

- Translated a procedural Fortran weather application into an object-oriented Java implementation.
- Utilized GitLab version control, branching strategies, and CI/CD pipelines.
- Developed testing and validation procedures to ensure functional equivalence.

Django Systems Engineering Portfolio

- Designed and deployed a professional portfolio website showcasing engineering projects and technical experience.
- Implemented authentication, project management, and responsive web design functionality.
