Languages for the Administrator, Information Assurance, IT Security: Risk Management, Computer, and Network Security, Information Security, IT Security: Planning and Policy, Object Oriented Programming with Java, Fundamentals of Programming, Cyber Warfare, Legal Issues in information security, Open-Source System Security, Computer Forensics, IT Security: Access Control and Authentication, Application Security, Database System Security, Cybercrime, Statistics, introduction to Physics and labs, Intelligence and Homeland Security, Counterintelligence, Signal Intelligence and security, Threat Analysis, Cybersecurity, Introduction to Computer Science, and IT security: Implementation Plan, Applied Cryptography, Securing networks, Big Data Engineering, Programming Languages, Information Security, Formal Languages Overview.

PROFESSIONAL EXPERIENCE

TECHNICAL SKILLS & EXPERTISE

- **Security & Compliance:** Risk Management, IT Security Planning & Policy, Cyber Warfare, Cybercrime, Information Assurance
- **System Administration:** Windows/Linux Server Administration, Active Directory, WSUS, Linux Patch Management, VMware vSphere, IDM
- **Security Tools & Platforms:** Trellox ePO, Nessus, Splunk, SIEM, DISA STIG Tools, SCAP Compliance Checker
- **Backup & Disaster Recovery:** Backup Exec, Veeam, Cloud Storage (AWS, Azure), Disaster Recovery Planning
- **Programming & Scripting:** Java, Python, C++, PowerShell, Bash, SQL, MySQL
- **Networking & Threat Analysis:** Cybersecurity, Counterintelligence, Signal Intelligence, Securing Networks
- **Software & Technologies:** Wireshark, Nmap, JIRA, Confluence, Microsoft Office Suite, Open-Source Security

PROFESSIONAL EXPERIENCE

BAE System | 15th Space Surveillance Squadron| Telescope Operator | Administrator Linux/Unix and Windows

May 12, 2025 – Present | Maui, Hawaii

- Collaborated with ISSO, CISO, and cybersecurity leadership to implement security controls, validate compliance requirements, and support Authority to Operate (ATO) sustainment
- Deployed security plugins, signatures, and platform updates across enterprise environments using Trellix ePolicy Orchestrator
- Coordinated with security teams to test, approve, and deploy endpoint protection updates, threat detection content, and compliance policies
- Supported vulnerability remediation, security patch validation, and configuration changes across Red Hat Enterprise Linux mission systems
- Monitored security events and validated remediation effectiveness using Splunk
- Worked directly with ISSO and CISO stakeholders to maintain STIG compliance, audit readiness, and continuous monitoring requirements
- Supported mission critical telescope and sensor operations for U.S. Space Force space domain awareness missions in Maui
- Monitored telescope system health, operational status, environmental controls, and supporting infrastructure to ensure continuous mission availability
- Performed troubleshooting and recovery of telescope control systems, network connectivity, Linux servers, and associated mission applications
- Coordinated with operators, engineers, and mission stakeholders to resolve hardware, software, and communications issues impacting sensor operations
- Supported scheduled maintenance, system upgrades, configuration changes, and operational validation for telescope and mission support systems
- Assisted in incident response, root cause analysis, and development of operational procedures to improve

BAE Systems | System Administrator Level 2

March 2023 – 2025 | Manchester, NH

- Installed, configured, and maintained operating systems and software applications.
- Managed user accounts, access controls, and system security policies.
- Conducted security audits, vulnerability assessments, and compliance monitoring.
- Utilized **Trellix ePO** for cybersecurity monitoring and policy enforcement.
- Performed **Nessus-based vulnerability assessments** and generated security reports.
- Managed **Windows Server Update Services (WSUS)** and **Linux patching** with automation tools (Ansible, Puppet).
- Implemented **Splunk** for real-time security monitoring and data analytics.

VMware vSphere Administrator

- Installed, configured, and managed **VMware ESXi** on enterprise-grade hardware.
- Deployed and administered **vCenter Server Appliance (vCSA)** for centralized management.
- Configured **datastores, virtual networking (vSwitches, VLANs), and VM security policies**.
- Implemented **ESXi Lockdown Mode, MFA, and firewall rules** to enhance security.

Backup & Disaster Recovery Administrator

- Managed **Backup Exec & Veeam** for data protection and disaster recovery.
- Configured backup policies for hybrid storage environments (on-prem & cloud: AWS, Azure).
- Performed **disaster recovery planning, file restoration, and compliance auditing**.

System Security Administrator – STIG Compliance

- Conducted **STIG assessments and security hardening** for Windows, Linux, and network devices.
- Enforced **DISA STIG, NIST 800-53, and CIS compliance** standards.
- Utilized **SCAP, Nessus, and PowerShell scripting** for automated security audits.
- Implemented **access controls, audit logging, and security monitoring integrations**.

System Level 2 Debug Technician | Zoll Medical

December 2023-March 2023 | Manchester, NH

- Conducted **hardware debugging, root cause analysis, and in-circuit testing**.
- Utilized **oscilloscopes, signal generators, and diagnostic tools** for troubleshooting.

Technical Analyst | C2Squared Systems

February 2022 – February 2023 | Manchester, NH

- Provided **IT support, troubleshooting, and documentation** for enterprise environments.
- Participated in **on-call rotations for system maintenance and incident response**.

Ground Transportation & Computer Assistant | U.S. Air Force

October 2015 – March 2022 | Honolulu, HI

- Managed IT systems across **Air Force & Navy networks (NIPR & SIPR)**.
- Oversaw **IT asset inventory, equipment upgrades, and cybersecurity initiatives**.

Manufacturing Tester/Assembler | Zoll Medical

January 2013 – October 2014 | Chelmsford, MA

- Tested and debugged **electronic circuit boards and medical devices**.
- Ensured **quality compliance with ISO and FDA standards**.

EDUCATION & CERTIFICATIONS

American Military University

- **Bachelor of Science in Information Security** – *Graduated June 2021 (GPA: 3.3)*

University of New Hampshire

- **Master's degree in information technology** – *GPA 3.2 Moved to another school*

Western Governors University

- **Master's degree in Computer science** Master of Science, Computer Science, Computing Systems - Present

Technical Training & Certifications

- **Security+ (CompTIA)** – *January 2023*
- **Information Technology Certification** – *January 2016*
- **Manufacturing Technology Certification** – *May 2013*
- **Vehicle Operations Apprentice Certification** – *June 2016*
- **Splunk Core Certified User** – *May 2025*
- **Enterprise Linux 7 System Administrator 11** - *May 2025*
- **Windows Server 2019 Administrator** - *May 2025*
- **Python Foundations** - *May 2025*
- **Automation with Ansible** - *May 2025*
- **Enterprise Linux 7 system** - *May 2025*

Leadership & Professional Development

- **John C. Maxwell - The 360 Leader** (*October 2016*)
- **John C. Maxwell - Developing the Leader Within You** (*August 2016*)
- **Hackham-Based Honor Guard** (*March 2021*)

AWARDS & RECOGNITION

- **Letter of Appreciation** – 15th Wing (PACAF) Commander, Joint Base Pearl Harbor-Hickam
- **Letter of Appreciation** – James G. Clark, SES, DAF Director, ISR Modernization & Infrastructure
- **NAVSUP Award** – Captain Trent C. Kalp, U.S. Navy, Commanding Officer of NAVSUP Fleet Logistics
